

Water Dish Channels ●

Water dish channels offer efficient water drainage, preventing water accumulation and potential hazards. They help prevent soil erosion, enhance safety by reducing slip risks, and contribute to an organized and visually appealing outdoor environment. These channels are versatile, suitable for various surfaces, and require minimal maintenance, making them a practical and functional solution for managing water runoff.

Utilizing hydraulic press and vacuum de-watering machines equipped with advanced German technology further underscores your dedication to manufacturing top-notch products. The ability to offer a variety of shapes and sizes provides flexibility for different projects and design requirements. Additionally, the option to paint the kerb stones based on customer preferences adds a personalized touch and enhances their aesthetic appeal.

Available Sizes		
Length	Width	Thickness
600 mm	325 mm	80 mm
600 mm	325 mm	100 mm
600 mm	325 mm	125 mm
600 mm	325 mm	150 mm
