SQUARE PAVERS

Available Sizes		
Length	Width	Thickness
100 mm	100 mm	60 mm
150 mm	150 mm	60 / 80 mm
160 mm	160 mm	60 mm
200 mm	200 mm	40 / 60 mm

Durability: Square pavers are made from robust materials such as concrete or stone, making them highly durable and able to withstand heavy foot traffic and weather conditions.

Low Maintenance: They require minimal maintenance compared to other types of outdoor surfaces like grass or asphalt. Regular sweeping or power washing is usually sufficient to keep them looking good.

Versatility: Square pavers come in various sizes, shapes, and colors, allowing for endless design possibilities. You can create intricate patterns or keep it simple, depending on your aesthetic preferences.

Easy Repairs: If one or more pavers become damaged or stained, they can be easily replaced individually without disturbing the entire surface.

Environmentally Friendly: Permeable square pavers can be used to create eco-friendly driveways or walkways that allow rainwater to filter through, reducing runoff and helping to replenish groundwater.

Increased Property Value: Well-designed and well-maintained paver installations can enhance the curb appeal of a property, potentially increasing its value.

Uses

- ◆ Patios
- ◆ Pathways
- ◆ Driveways
- ◆ Pool Decks
- ◆ Garden Borders
- ◆ Courtyards
- ◆ Steps and Stairs
- ◆ Retaining Walls
- ◆ Garden Accents
